“IBF provides market insights and helps your business capture new opportunities.”

The transition of fusion energy from the national laboratories to the marketplace is now well underway. Private companies are contributing to deliver innovative solutions to market at scale, attracting talent, and structuring supply chains.

Connect
with European & international **companies**

Create
to establish Public-Private **Partnerships**

Cooperate
to accelerate the fusion energy transition **from the lab to the grid**

Attendees	Worldwide companies	Expert speakers	Booths	B2B meetings	Technical workshops

- Massive components assembly
- Robotics
- Maintenance for ITER operations
- Fusion Fuel Cycle
- Using AI in fusion machines
- Heating systems challenges
- Diagnostic tools & monitoring
- Plasma facing materials & components
- Plant systems, cryogenics
- Global perspectives to structure the fusion supply chain
